

## EP-03 : SE-16RB RELAY BOARDS

The SE-16RB contains sixteen relays for isolating control circuits. One terminal strip is for relay coil inputs and the other terminal strip is for 1-A, 250-V, fused, relay contact output connections. The following diagram shows an SE-16RB for 12-Vdc or 24-Vdc applications. Consult factory for other configurations.
