New Sensing Resistors for the SE-325 Neutral-Grounding- Resistor Monitor

The new ER-25KV, ER-15KV, and ER-5KV are shown below. These new models, featuring enhanced reliability in harsh environments, were phased in over the past year. The new sensing resistors are for use with existing or new SE-325 neutral-grounding-resistor-monitoring systems. They replace the ER-25KVC, ER-15KVC and ER-5KVC ceramic core models.

There is a price change that reflects the increased cost of manufacturing. Please contact your distributor for pricing.

Dimensioned drawings of the new resistors can be found online at www.startco.ca in the new SE-325 manual.

New Newsletter

This is our first STARTCO Newsletter and we welcome your feedback. If you have comments or suggestions please send email to info@startco.ca or fax us at 306-374-2245.

This mailing was sent to our existing database; let us know if you have colleagues who would like to receive the Newsletter. If you would like to be removed from the mailing list use the above email address or fax number.

If you are using Startco electronic products, you may be eligible to receive a free jacket. We are looking for your feedback on your experience with Startco's family of standard products.

Send us a brief description of the application and a picture of the product in use. This information may be displayed on our web site and in promotional material. Every submission that is used will be rewarded with a Startco jacket. Entrants will be contacted for further information. Entries not used are eligible to receive a consolation prize. Please have company permission before submitting your material.

Entries and questions can be submitted by:

Email: info@startco.ca
Fax: 306-374-2245
Mail: Startco Engineering Ltd.

STARTCO® Celebrates its 25th Year!

In the beginning, **STARTCO** was just a **STARTer CO**mpany.

The "starter" was a reduced-voltage, phase-controlled-thyristor design for high-inertia loads – and it was new.

The starter's electronic design was new – it was digital! The starter's power design was new – it was reliable!

The starter's thermal design was new – it was cool! The company was new – it was STARTCO, and it was 1975.

August 18th, 2000 will be our 25th Anniversary. We would like to thank all of our customers for their support over the years. You have helped us grow into a world-class electrical manufacturing company.
